

Practical Otolaryngology for the Primary Care Provider

9 November 2024

Baylor Scott & White Medical Center – McKinney Campus

Hosted by the ENT and Allergy Centers of Texas in partnership with the Texas Medical Association. Morning sessions in the Independent Bank Auditorium (main hospital, lower level). Afternoon sessions at the ENT and Allergy Centers of Texas clinic (Physician Office Building #2, first floor).

Statement of specific educational objectives

Once the participant has completed the education, the participant should be able to:

- Implement an organized and quick stepwise approach to treating refractory sinusitis
- Discuss the current optimal approaches for providing care for patients with obstructive sleep apnea
- Utilize physical examination of the ear with techniques for improved accuracy
- Describe the current best-practice for treating patients with nasal emergencies
- Employ current protocols for treating patients with sudden hearing loss
- Implement optimal management strategies and new rehabilitative options for patients with hearing loss
- Apply the current indications for allergy testing, evaluation techniques, and treatment options

- Educational methods to be used:
Lectures followed by small group discussions
- Description of specific audience for whom the program is designed:
Primary care providers from all backgrounds
- Prerequisites required of participants:
Active providers and medical providers in training

Dr. Benjamin Cable, MD
